OCR Cambridge National in Engineering Manufacture

Engineering manufacture is a discipline of engineering dealing with different manufacturing practices and processes using the machines, tools and equipment that turn raw materials into new products.

This qualification will enable you to study these processes. It will also allow you to operate the tools and equipment used to make products from the requirements of a design specification, as well as use relevant computer applications such as CAD/CAM, and CNC equipment.

Units

Engineering materials, processes and production

Preparing and planning for manufacture

Computer-aided manufacturing

Quality control of engineered products
